ROCK PLANTS

SPRING PRICE LIST
and
AUTUMN ANNOUNCEMENTSE. J. SNYDER
135 Irvington Ave., BRADFORD, O.

WHERE ? Drive north on the main street through the downtown section. Take the second street west straight into the nursery. To locate the residence, look eastward across the perennial beds to the rock terrace marking the garden in the rear of our house.

NEW LOW PRICES

In keeping with the spirit of the times, we are doing our utmost to reduce our prices. On practically every item in our list the prices have been sharply reduced.

PLANTS OF THE HIGHEST QUALITY

For many years we have been selecting from the world's best varieties of flowers. Our seeds and cuttings are secured directly from the originators whenever possible. A splendid clay loam gives unexcelled vigor to our plants. We dig our plants with a ball of earth so they will grow on for you without a set-back.

TO BUY MOST ECONOMICALLY

1. Buy early in the spring. Until May 1st. we will give a discount of ten percent.
2. Buy in quantity. Six plants of a kind for the price of five. Special quotations on larger numbers. Ask for special quotations on plants for your whole garden, border or any other project you have in mind.
3. Buy younger perennials. We offer strong seedlings and transplants all through the spring and summer at from one to three cents each. Being past the difficult stages, they are easily grown into fine, mature plants.
4. Order by mail. We pay the postage on orders of one dollar or more where distances are not greater than 150 miles. Of course, we would like very much to have you visit our nursery but it really is very economical and convenient to buy by mail. Please turn to the next page.

MAIL ORDERS

Our mail order trade is increasing rapidly. Repeat orders come from most of our mail order customers for they have been pleasantly surprised at receiving such splendid, growing plants at less than half the usual catalog prices.

Ordering by mail saves the time and expense of driving to the nursery. Just tell us what you want and inclose your check or a money order for the amount. We will select the strongest and best plants in the bed just as you would. Our successful experience in packing for many customers over 2000 miles away insures that you will receive your plants in perfect condition.

SPRING PRICE LIST.

ROCK PLANTS are indicated by the letter R at the left of the name. These plants are also very desirable for edgings or in the front of the border.

Achillea, Boule de Neige. Double white. 2 ft. June-Sept.	.10
Aconitum Fischeri. Dark blue flowers. 2-3 ft. Sept.-Oct.	.15
R Aethionema Persicum. Tiny shrub. Pink. 9 in. June-July	.15
Ageratum, Hardy. "Blue Mist" Blue. 1 ft. Aug.-Sept.	.10
Agrostemma Coronaria. Rosy crimson. 2½ ft. June-July.	.08
R Alyssum Saxatile Compactum. Yellow. 9 in. April-May.	.10
R Alyssum Serpyllifolium. Yellow. 4 in. May-June	.20
R Alyssum Citrinum, Yellow. 6 in, very compact. Apr.-June	.20
Anchusa Barrelli. Best May flowering blue perennial. 2 ft.	.15
R Anchusa Myosotidiflora. Fine blue flowers. 1 ft. Apr.-May.	.20
R Anemone St. Brigid, Double flowers, many colors. 1 ft.	.20
Anthemis Tinctoria Kelwayii. Golden Yellow. 2 ft. June-Se.	.10

AQUILEGIAS

Special conditions enable us to grow these to perfection. Our collection is, we believe, unsurpassed. Next spring we will release some surprises in aquilegias. Watch for them.

R Alpina. Dwarf, clear blue. Short spurred. Very early.	.15
R Alpina Superba. Deep blue, white center. Short-spurred.	.15
R Coerulea, Rocky Mt. Lovely blue, white center. Long spurs.	.20
R Coerulea, Mrs. Nichols. Improved Rocky Mountain.	.25
Dobbie's Imperial Hybrids. Finest Long-spurred strain. 1 yr.	.08
Emily Tenney. A lovely long-spurred lavender.	.25
Josephine Marsh. Old rose with yellow center. Very late.	.20
R. Flabellata. 9 in. Very striking foliage. White. Short.S.	.15
Mrs. Scott-Elliott's Hybrids. Best-known long spurred. 1 yr.	.08
Rose Queen. Soft rose with white center. Long-spurred.	.20
Silver Queen. The finest long-spurred white.	.15
Storrie's Scotch Hybrids "Scotland Yet" Long-spurred.	.15

 Lychnis Chalcedonica Salmon Queen. 3 ft. All summer .10
 R Lychnis Viscara Splendens. Bright pink. 15 in. May-June .15

IRIS, GERMAN OR BEARDED

A well-grown clump of Iris in full bloom is a beautiful sight. This is especially true of the newer and finer varieties such as are listed below. The delicate and unique beauty of the blooms is certain to dispel from the mind any idea of Iris being "common".

We urge that you make selections during the blooming period and move them at once. We guarantee safety in moving them at that time. Prices are at the rate of 10¢ per rhizome except where otherwise priced in the list.

Alcazar. S. light bronzy violet. F. velvety purple.
 Ambassadeur. S. reddish violet. F. rich velvety purple. .20
 Cecil Minturn. Lilac pink. Compares with Susan Bliss
 Dalila. S. flesh white. F. violet red with yellow beard.
 Dream. Lilac pink, clear and delicate.
 Dusky Maid. S. coppery tan. F. red purple
 Gold Crest. Bright violet blue with golden yellow beard.
 Gaudichau, Souv. de Mme. A deep purple bicolor, velvety. .20
 Kochii. Rich deep purple. Very early.
 King Karl. Ruffled cream stippled with coppery colors. .30
 Lent A. Williamson. S. lavender violet. F. deep pansy violet.
 Ma Mie. White frilled with blue. The best of its kind.
 Monsignor. Pale violet and deep purple. Very free blooming.
 Mother of Pearl. Light bluish lavender, creamy undertone.
 Mrs. Allan Gray. A delightful lilac shade.
 Midwest. Ruffled white stippled with rosy purple.
 Opera. S. rich pansy violet. F. velvety violet purple. .20
 Perfection. S. light blue. F. Velvety violet black.
 Prosper Laugier. S. bronzy red. F. deep velvety crimson.
 Prospero. S. Pale lavender. F. deep red purple.
 Princess Beatrice. S. light lavender. F. deeper color.

Trojan.	Pink. Fully double. Earliest to bloom.	.25
Buckeye.	Deep red. Fully double. Midseason.	.25
Miami Queen.	Pink. Last to bloom. Fully double.	.25
James Kelway.	Single, large flowered, deep red.	.15
Selected red shades,	many double.	.20
Lighter shades,	many double.	.10

PAPAYER ORIENTALE

The named varieties of oriental poppies are very scarce. A collection of even a half dozen good types is a rarity. Since people have become better acquainted with the desirable qualities of these flowers the demand has grown by leaps and bounds. The named varieties always come true; they never "run out". They are hardy, dependable and permanent. They may be had in colors from delicately beautiful shades that blend well with other flowers to dark red shades that are most impressive in their individual flaming splendor.

The prices listed below are for heavy blooming size plants with a large ball of earth. We have them in smaller sizes at lower prices. For fall we will have divisions and cuttings that are well started at about one third the prices quoted here. To get immediate results, buy early this spring.

Apricot Queen. Reddish apricot color.	.70
Beauty of Livermore. Deep crimson. Large flowers.	.50
Bracteatum. Blood red, shaded orange. Strong grower.	.75
Brightness. Bright orange scarlet. Very free blooming.	.75
Cerise Beauty. Cerise pink. An excellent late variety.	.70
Duke of Teck. Light crimson. Very free blooming.	.60
E. A. Bowles. Delicate apricot, changing to shell pink.	.75
Enfield Beauty. Rich salmon. Late blooming.	.50
Ethel Swete. Distinct cherry pink.	.85
Flanders. One of the best new oxblood red varieties.	.60
Goldschmidt. Scarlet. Medium size. Free blooming.	.75
Grand Mogul. Deep red. Often 8 in. flowers on 3 ft. stems.	.60
Grossfurst. Enormous dark red flowers.	.75
Henry Cayeaux. Old rose shading into wine color.	.70
Joyce. Unique old rose color. Tall, vigorous growing.	.75
Lightness. Soft rose with lower petals almost white.	.75
Lord Lambourne. Orange scarlet. Deeply fringed petals.	1.00
Lulu A. Neeley. Acclaimed the best oxblood red.	.50
Mahogany. Rich mahogany. The darkest color in poppies.	.50
May Queen. Deep salmon red. Double. One of the earliest.	.90
May Sadler. Salmon pink. Tall growing. Midseason.	.50
Masterpiece. Silvery pink. Very large flowers on strong St.	.60
Mrs. Perry. Bright clear pink. Splendid growing habits.	.35
Negrillon. Vivid carmine. Requires partial shade.	.90

Oriflamme. Orange-scarlet-red flowers of immense size.	.75
Perfection. Large deep flowers of lovely pink.	1.50
Perry's White. Petals satiny white with maroon blotch.	.90
Pink Beauty. Clear pink with black base to petals.	.75
Princess Ena. Small tulip-like flowers. Salmon pink.	.75
Princess Victoria Louise. Delicate pink. Medium size.	.60
Proserpine. Rich scarlet. Striking buds-enormous bloom.	.75
Royal Scarlet. Richest scarlet. Flowers small but free.	.50
Rose Queen. Excellent old rose. 15-18 in. high. Very free.	.90
Salmon King. Considered the best salmon.	.75
Trilby. Cerise scarlet. Large flowers. Very scarce.	.90
Tulipa. Orange pink. Tulip shaped blooms on good stems.	.75
Wurtembergia. Brilliant scarlet flowers of great substance.	.75

"Every human being has a craving to be a creator. Each of us feels that he must make this world a little better, or at least a little bit different, than it was before he found it. The garden is about as good a place for a child to start his creative work as can be found."

Angelo Patri.

- Rudbeckia Newmanii. Orange-yellow with dark center. 3 ft. .10
 Rudbeckia Purpurea. Purple with brown cone center. 3 ft. .10
 R Saponaria Ocymoides Spondens. Rosy pink. 8 in. May-June. .10
 Scabiosa Caucasica, Isaac House's Hybrids. One of the finest
 perennials in existence. 2 ft. Blue shades. All summer. .35
 Scabiosa Japonica. Biennial. Lavender blue. 2 ft. All sum. .10

SEDUMS

These are very fascinating and desirable plants for the rock garden or border. We have selected only the best kinds. Some are of moderately spreading habits. Others stay small and compact for three years or more, and are then easily divided. Priced according to size of clumps.

- R Acre. Neat mat of rich green. Golden bloom. 2-3 in. June. .05 & .10
 R Album. Thick waxy, round foliage. White. 2-3 in. July. .05 & .10
 R Anglicum. A very scarce variety. Forms dense mats of brilliant
 light green foliage. White bloom. 1 in. July. .05 & .10
 R Brevifolium. Leaves almost globular. White 2-3 in. .15
 R Eversii. Bluish gray foliage. Purple. 6 in. Sept. .10
 R Ibericum. Toothed leaves. Pink and white. 6 in. June-July. .15
 R Kamchaticum. Deep green foliage. Orange. 6 in. July. .10
 R Lydium. Dainty dwarf. Foliage turns to red in winter. .15

 R Reflexum. Trailing. Gray-green foliage. 3 in. yellow. July. .15
 R Sexangulare. Dark green. Compact. 4 in. yellow. June-July .15
 R Stoloniferum Coccineum. Trailing. Leaves crimson in winter. .
 5 in. Crimson bloom. July. .05 & .10
 Spectabile Brilliant. Deep rosy crimson. 10 in. Aug.-Sept. .15
 Spectabile, Rosea. Pink bloom. 15 in. Aug.-Sept. .10

- R Sempervivum Brauni. Leaves bronze, almost red at the tip. .15
 R Sempervivum Funki. Leaves brown with green tips. .15
 R Sempervivum, Tectorum. Broad rosettes, leaves tipped brn. .10

 Sidalcea, Rosy Gem. Bright rose. 18 in. July. .15
 Sidalcea, Rose Queen. Pink. 3 ft. Aug. .15
 R Silene Schafta. Bright pink. 5 in. July-Oct. .10
 Stokesia Cyanea, coerulea. Light blue. 2 ft. July-Oct. .10
 R Tunica Saxafraga. Tufted plant. Light pink. 6 in. July-Sept. .10
 R Veronica Amethystina Royal Blue. 10 in. June. .10
 R Veronica Repens. Dainty creeper. Light blue. 1-3 in. May. .08
 R Viola Jersey Gem. Pure violet blue. Sturdy and compact. .15
 R Viola White Jersey Gem. Habits of the above. Dainty white. .20
 R Jersey Jewel, Viola. Color true pansy violet. Scarce. .20
 R Viola Papillio. Blue and white. Large flowers. Sturdy. .08
 R Viola Sutton's Apricot. Apricot with orange center. .15
 R Viola White Perfection. Pure white. Large flowers. .08

ANNUAL PLANTS

Since the production of perennial plants demands nearly all our time and equipment we have reduced the number of varieties of annual plants to the ones we absolutely have to raise for our own use. These being practically unobtainable elsewhere, we are raising them in quantities sufficient for our customers.

Last year, due to late freezes, our plants were too small for the best satisfaction. This spring added hot-bed facilities insure sturdy, well-advanced plants as soon as it is safe to plant them in your garden.

ASTERS-DISEASE RESISTANT.

Resist wilt and stem rot, even in infected soil. Not immune to the yellows since this is spread by a leaf hopper all through the summer. Seeds from the originator.

Mary Semple. Rich shell pink. Sept. blooming. Per doz. .15
Finest mixture resistant varieties. Aug.-Sept. " " .15

THE BALL CALENDULAS

The improvement in these is truly remarkable. We offer the outstanding dark centered varieties. Seeds from the originator.

Ball's Lemon Queen. Bright yellow with attractive dark center. Fine color effect. Per doz. .15
Ball's Supreme. Rich shade of light orange with finely contrasting dark center. Per doz. .15

THE NEW MAJESTIC SNAPDRAGONS.

Originating in England, these snapdragons are rapidly gaining first place in this country. They have even larger blooms than those of the giant type. The blooms are close-set on sturdy stems 18 to 24 in. in height. They excell all other varieties in beauty of color and freedom of bloom.

In selecting your plants, we offer you an unusually effective and pleasing method. The noted English flower artist, Winifred Walker, has made a life-sized painting of these snapdragons in their true colors. With our reproduction of this beautiful picture as a guide, you will enjoy selecting the colors you prefer.

Strong transplanted plants. doz. 15

Majestic Eldorado. Deep golden yellow.
Majestic Golden Dawn. Golden buff overlaid salmon.
Majestic Red Chief. Rich deep scarlet.
Majestic Rose Marie. Light salmon rose with golden center
Majestic Twilight. Delicate apricot with old gold center and salmon shading.

ANNUAL PLANTS--(CONTINUED)

EVERLASTINGS

We grow many kinds of the everlastings for our own use. We recommend the statices and strawflowers for beautiful summer display as well as for dried flowers.

STATICE CASPIA. A hardy perennial that can be moved only when small. Fine, misty lavender bloom. Excellent as a border plant, cut flower or dried. Plants in late May per doz. .20

STATICE DUMOSA. A hardy perennial best moved when young. Like caspia, it is new to this country but highly admired wherever grown. Bloom is larger than caspia, lavender when fresh but white when dried. Plants late May per doz. .20

STATICE SINUATA is a very beautiful annual. We offer the new "True Blue", rosea superba and special hybrids. doz..15

STRAWFLOWERS. Finest monstrosus strains in the following colors: Rose, Gold, Salmon, Pink and Violet. Per doz. .12½

PETUNIAS

We have selected the two outstanding dwarf bedding var. Rose of Heaven. Deep rose pink with white throat. Per doz. .15
Heavenly Blue. Very choice silvery blue. Per doz. .15

MODERN ZINNIAS

In Bodger's dahlia-flowered zinnias we have the highest development of this flower. Our plants are from Bodger's seeds.

ORIOLE. Glistening orange shaded with gold. Per doz. .15

EXQUISITE. Rich rose with deeper rose center. " .15

LILLIPUT SALMON ROSE. Dwarf pompom type. Per doz. .12½

HARDY WATER LILIES

Pink Opal. Opal tinged with pink. Excellent grower. .50

Chromatella. Clear, rich yellow. Mottled leaves. .50

GARDEN SUPPLIES

Imported German Peat. Standard 20 bu. bale, per bale 3.50

Imported German peat, screened ¼ in. mesh. per bushel .25

Wooden garden labels, 3½ in. copper wired. per 100 .35

Wooden garden labels, 6 in., pointed for the ground. 100 .35

FALL ANNOUNCEMENTS

Many of the most desirable perennials come from seeds that are difficult to germinate or that require long periods of time--often a whole year. Because of these difficulties, amateurs rarely try to grow them and nurserymen find more profit along other lines. We have succeeded in growing such seeds very economically and will offer large stocks of the plants this fall and next spring. Once started and transplanted, these plants handle as easily as any others. Our plantings include Aconitums, Anemones, Dicentras, Dictamnus, Heucheras, Helleborus, Liatris, Primulas, Penstemons, and the evergreens. We shall also add to our present list many new perennials and rock plants which we have found to be most desirable and dependable.
